

LEONARDO GARBUIO CAVALHEIRO

FULL-STACK DEVELOPER | AI TOOLS & PRODUCT ENGINEERING

Ponta Grossa, PR, Brazil | leonardogarbuiocavalheiro@gmail.com | +55 42 99154-6824

linkedin.com/in/leonardogarbuiocavalheiro | github.com/LeonardoGarbuio | leonardogarbuio.github.io/Portfolio

PROFESSIONAL SUMMARY

Full-stack developer and Information Technology student with three years of hands-on programming experience and experience shipping production web applications for real clients. Builds end-to-end products across React/Next.js frontends, Node.js APIs, PostgreSQL/Supabase data, testing, security, Docker and AI integrations. Seeking a fully remote software engineering internship or part-time role (20 hours/week) from Brazil.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS

Frontend: React, Next.js, Three.js, Zustand, Tailwind CSS, Vite, responsive design

Backend & Data: Node.js, Fastify, REST APIs, PostgreSQL, Supabase, Prisma, SQLite, Drizzle

Tools & AI: Git, GitHub, Docker, Linux, Turborepo, pnpm, automated testing, Ollama, AI API integrations

EXPERIENCE

DevTech - Founder & Full-Stack Developer | Remote, Brazil | Jan 2026-Present

- Delivered two responsive production websites and a custom architecture project management platform for real clients.
- Built end-to-end features with Next.js, React, Node.js, REST APIs, Prisma and PostgreSQL/Supabase, including authentication and role-based access control.
- Owned requirements, implementation, deployment and direct client communication from initial brief through delivery.

SELECTED PROJECTS

PatchPilot - github.com/LeonardoGarbuio/PatchPilot | TypeScript, React, Fastify, Docker, SQLite, Drizzle, SSE, Turborepo

- Built a local-first AI coding agent that plans repository changes, edits code inside isolated Docker sandboxes, runs automated verification and presents a complete diff for human approval.
- Supports local Ollama models and optional cloud APIs, with real-time execution updates and a human-in-the-loop review workflow.

Lab 3D - lab-3-d-saa-s.vercel.app | React, Three.js, Zustand, Supabase, PostgreSQL

- Created an interactive chemistry education SaaS with real-time 3D molecular visualization, guided missions and a custom chemical reaction engine.
- Implemented persistent user data, application security controls and automated tests across the learning workflow.

EDUCATION & RESEARCH

Instituto Federal do Parana (IFPR) - Technical High School Diploma in Information Technology | Ponta Grossa, Brazil |

Expected Dec 2027

- Coursework and projects in software development, databases, APIs, Git, Linux and computer systems.
- PIBIC-Jr Research Scholar since 2025 and research group member since 2024; contributed to academic outputs and built a web-based informational booklet for the project.
